

Technical Product Manager

Interested in applying for this **New York City** based position?

Send an email to jobs@treno.io

At **Treno**, we are building the operating system for software development. Building quality software is difficult, and most enterprises struggle with it. We are building a platform driven by machine learning that will optimize the way that development teams build and deliver software projects. Seriously, this is next level stuff! We are a passionate group, based in New York City, that is backed by prominent VCs including Comcast Ventures and the team behind Flatiron Health.

We're searching for an innovative and motivated **Technical Product Manager** who wants to get their hands dirty as we build out the first iteration of our product. In this role, you will work directly with our founder who has run engineering and product organizations at IBM, Dell, SuSE, Oracle, Wrike and others. You will also be responsible for working with our early customers to validate the product vision and then closely with our development team to build it out.

What We Expect From You:

- Technical literacy and an excellent grasp of the software development lifecycle
- Detailed understanding of the challenges faced by software development teams
- Clear understanding of the roles within the product management, software development and customer support teams. as well as how the teams interact and collaborate
- You're excited to contribute and take ownership at the very earliest stage of a company.
- Detailed knowledge and experience with the core technologies used by software development organizations, including:
 - Agile project management tools such as Jira, Clubhouse, and Rally
 - Source control and code repositories such as GitHub, GitLab and Bitbucket
 - CI/CD tools such as Jenkins, CircleCI and Helm
 - Application performance monitoring (APM) tools such as DataDog and AppDynamics
 - The major cloud (AWS, Azure, GCP) application deployment environments

The more you know the better. We would love it if you are an expert in the platforms listed above, but at a minimum you need to understand how and why development teams use those tools.

Our Ideal Candidate Has:

- 3 to 5 years of experience defining product features and roadmaps and working directly with engineering teams as a product leader

- Excellent analytical skills with the ability to work directly with customers with empathy and focus
- Inspirational, engaging and clear communication style
- Process-oriented and experienced with agile software development methodology
- The ability to learn quickly and execute

If you're looking for a ground floor opportunity with a venture backed SaaS startup, this opportunity may be just for you. We just closed our seed round – financed by the industry's best venture capitalists and now we are growing our team. Our offices are small, but brand new and located in West SoHo – about a three minute walk from the 1, 2, A, C, and E trains, and just a ten minute walk from the B, D, F and M trains.

Why You'll Love Working at Treno

- You will be joining a creative and fast-growing team, and have the opportunity to have a meaningful impact on decisions that will ultimately determine the role of product at Treno.
- We have brought the best of Silicon Valley to New York City.
- Competitive compensation plan including equity in the company: we want you to own a piece of what you're building.
- Comprehensive benefits: we offer 401K, health, dental and vision benefits.
- Flexible vacation plan: our unlimited time off policy allows you to take the time off you need when you need it.
- Great people: make an impact on something that truly helps people alongside an incredible team.
- We care about diversity: diversity allows us to build an excellent patient experience. We are an equal opportunity employer and we do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.
- Unlimited career growth opportunities.
